

LINDA LIU

(778)-251-6263 | lindaliu444@gmail.com | lindaliu.net | github.com/lindaliu1 | US/Canada Citizen

EDUCATION

University of British Columbia

May 2026

Bachelor of Science in Computer Science

Vancouver, BC

- Relevant Coursework: Algorithm Design and Analysis, Software Engineering, Relational Databases, Artificial Intelligence, Machine Learning, Computer Hardware and Operating Systems, Human-Computer Interaction

EXPERIENCE

SAP

September 2024 – August 2025

Software Developer Intern

Vancouver, BC

- Owned and shipped a charting feature in SAP Analytics Cloud, correcting numeric rendering across 4 chart types
- Built Jest unit and integration tests to validate logic and prevent regressions during parallel feature development
- Resolved 90+ customer issues using TypeScript, React, Redux, and Jest, with fixes backported to live production
- Cut cross-team code validation by 70% and standardized test workflows by migrating 400+ legacy unit tests to Jest
- Awarded Fast Track Recognition through manager nomination for exemplary teamwork and feature ownership

University of British Columbia

May 2024 – August 2024

Undergraduate Research Assistant

Vancouver, BC

- Labeled 150+ equine radiographic images with RectLabel to optimize custom machine learning model results
- Fine-tuned deep learning models using RetinaNet for bounding box localization and ViTPose for pose estimation
- Designed and proposed custom machine learning algorithms with veterinarians to best address requirements

PROJECTS

Our Endangered Oceans | TypeScript, Python, Next.js, FastAPI, PostgreSQL

[GitHub](#)

- Designed an interactive Next.js visualization, dynamically positioning endangered species by habitat depth level
- Built a scroll-driven exploration interface (7,000px), enabling progressive hover-based viewing of species metadata
- Implemented an ETL pipeline scraping, normalizing, and upserting 100+ third-party records into PostgreSQL
- Developed a FastAPI backend exposing filtered REST endpoints over relational data, supporting gradual exploration

insightUBC | TypeScript, Node.js, React, Express, Mocha, Chai, Git

[GitHub](#)

- Developed a RESTful web application that dynamically queries UBC building, room, and course offering metadata
- Implemented query engine to parse 20,000 instances of HTML/JSON metadata and read queries in EBNF form
- Applied test-driven development practices using Mocha framework and Chai library, reaching 92% line coverage
- Designed an intuitive user interface that satisfied visual design principles and fulfilled user design requirements

Restaurant Management Database | PHP, SQL, HTML/CSS, Git

[Github](#)

- Collaborated in a team to develop a database-driven web application that actively queries and updates stored data
- Designed SQL schemas to manage employee information, organize customer reviews, and track kitchen inventory
- Implemented full CRUD functionality and 8 advanced queries surfaced through a database-backed user interface

Craigslist User Interface Redesign | Figma

[GitHub](#)

- Led an end-to-end redesign of Craigslist's web interface using Figma, driven by user research and usability testing
- Created interactive, high-fidelity prototypes using components and variants, refined based on user feedback

LEADERSHIP

Vice President, Finance

January 2022 – April 2023

UBC Data Science Club

Vancouver, BC

- Planned UBC's first artificial intelligence conference scheduled with industry panels and academic speakers
- Coordinated a 14-day long beginner friendly sustainability-oriented case competition preceding AI conference
- Outlined and helped prepare biweekly introductory data science workshops for data science club members

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, Java, C++ , HTML, CSS

Frameworks and Libraries: React, Redux, Next.js, FastAPI, Node.js, Express, Jest, Jasmine, Mocha, Chai

Developer Tools: Git, Bash, Jira, Gerrit, Visual Studio Code, Figma
