

LINDA LIU

(778)-251-6263 | lindaliu444@gmail.com | lindaliu.net | github.com/lindaliu1 | US/Canada Citizen

EDUCATION

University of British Columbia

May 2026

Bachelor of Science in Computer Science

Vancouver, BC

- Relevant Coursework: Algorithm Design and Analysis, Software Engineering, Relational Databases, Artificial Intelligence, Machine Learning, Computer Hardware and Operating Systems, Human-Computer Interaction

EXPERIENCE

SAP

September 2024 – August 2025

Software Developer Intern

Vancouver, BC

- Owned and shipped a production feature in SAP Analytics Cloud correcting numeric rendering across 4 core chart types and improving reliability by implementing 30+ Jest unit and integration tests
- Fixed configuration panel bugs in the GenAI “Just Ask” workflow, aligning components with platform architecture
- Resolved 90+ production issues using TypeScript, React, Redux, and Jest, backporting stable fixes to live releases
- Reduced cross-team validation overhead by 70% by migrating 400+ legacy tests to a standardized Jest framework
- Awarded Fast Track Recognition through manager nomination for exemplary teamwork and feature ownership

University of British Columbia

May 2024 – August 2024

Undergraduate Research Assistant

Vancouver, BC

- Annotated 150+ equine radiographic images to improve training data quality for custom machine learning models
- Evaluated computer vision models using RetinaNet for bounding box localization and ViTPose for pose estimation
- Collaborated with veterinarians to design custom machine learning approaches for equine radiographic analysis

PROJECTS

Our Endangered Oceans | TypeScript, Python, Next.js, FastAPI, PostgreSQL

[GitHub](#)

- Engineered an ETL pipeline to scrape and normalize inconsistent third-party marine data into a PostgreSQL schema
- Developed a FastAPI backend exposing filtered REST endpoints over relational data to enable dynamic querying
- Implemented an interactive Next.js visualization mapping endangered species to habitat depth, integrating API-driven data fetching and state synchronization using React hooks

insightUBC | TypeScript, Node.js, React, Express, Mocha, Chai, Git

[GitHub](#)

- Implemented a query engine parsing 20,000+ HTML/JSON records, executing EBNF queries for dynamic filtering
- Developed a RESTful web application in Node.js and Express to serve structured building and course metadata
- Applied test-driven development with Mocha and Chai, reaching 92% line coverage across parsing and query logic
- Designed a modular React frontend interface to manage client-side state and dynamically render query results

Restaurant Management Database | PHP, SQL, HTML/CSS, Git

[Github](#)

- Normalized relational SQL schemas with foreign keys to model employees, reviews, and inventory relationships
- Implemented full CRUD functionality and complex join-based queries with aggregations to support operations
- Developed a PHP-based web interface to enable transactional updates to inventory, employees, and review records

Craigslist User Interface Redesign | Figma

[GitHub](#)

- Led an end-to-end redesign of Craigslist’s web interface using Figma, driven by user research and usability testing

LEADERSHIP

Vice President, Finance

January 2022 – April 2023

UBC Data Science Club

Vancouver, BC

- Secured over \$10,000 in grant funding as VP Finance for UBC’s first student-led artificial intelligence conference
- Organized a beginner-friendly case competition preceding the conference, coordinating participant engagement
- Outlined and developed biweekly introductory data science workshops covering foundational topics for members

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, Java, HTML, CSS

Frameworks and Libraries: React, Next.js, Redux, d3.js, Node.js, Express, FastAPI, Jest, Jasmine, Mocha, Chai

Developer Tools: Git, Bash, Jira, Gerrit, Visual Studio Code, Figma
